Tips to Get Started
• Get great followers. Focus on quality rather than quantity.
• Offer interesting news & updates on your research
• Ask questions and re-post best answers.
• Follow relevant people. Use list-making features to group & more easily follow relevant people and news.
• Use pictures and have fun to create interest
• Retweet, but give credit. Use the retweet button sparingly
• Use Trends to assess top words or phrases being tweeted

For the Curriculum
Evidence-Based Medicine LibGuide from the Library
http://libraryguides.umassmed.edu/EBM

Learn more about, and find resources related to, Evidence-Based Medicine. EBM is the conscientious, explicit and judicious use of current best evidence in making decisions about the care of individual patients. The site includes guidelines, learning modules, primers, and further resources.

Using EBM effectively involves knowing the right question to ask, turning that question into a good search, knowing the best place to look, finding what is available and then using the evidence you find in the care of your patient. The library is happy to help with any EBM questions.
