

NIH Public Access Policy

And NCBI's My Bibliography Tool

NIH Public Access Policy

What is the law?

Final peer-reviewed manuscripts of articles arising from NIH funds must be submitted to PubMed Central **upon acceptance** for publication. Papers must be accessible to the public no longer than 12-months after publication.

NIH Public Access Policy

What does it apply to?

- Peer-reviewed journal articles
- Accepted for publication on or after April 7, 2008
- Arising from any direct funding from NIH grant or cooperative agreement, NIH contract, NIH Intramural Program, or NIH employee

NIH Public Access Policy

How is a paper submitted*?

- A. Journal submits and approves on behalf of author, without author involvement.
- B. Journal submits on behalf of author upon request of the author, usually for a fee.
- C. Author submits to via NIHMS.
- D. Author completes submission process for a submission initiated by the publisher.

NIH Public Access Policy

* Confirm your journal's NIH compliance policies and work with your publisher to ensure the conditions of the policy can be met when signing a transfer of copyright agreement **before** you publish your work.

NIH Public Access Policy

Who is responsible for compliance?

- The journal
- The submitting author
- The PI

NIH Public Access Policy

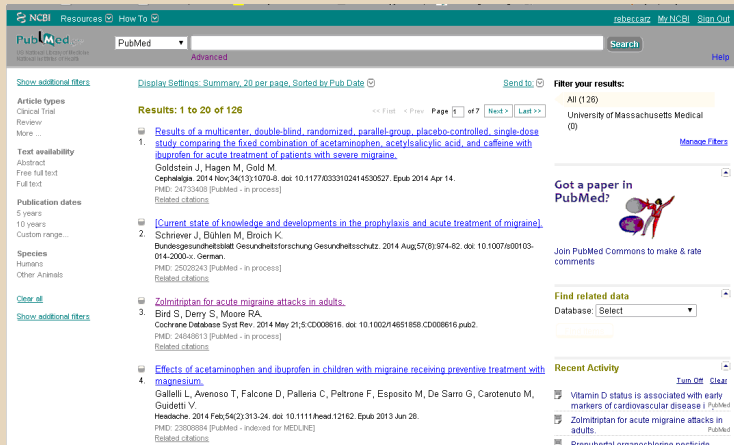

How do I demonstrate compliance?

Include a **PMCID** for each article authored, co-authored, or funded when submitting an application, proposal, or progress report to NIH.

- Include PMCID at the end of citations in applications, reports, or proposals.
- Use PMC-In Process or NIHMSID for citations that are within 3 months of formal publication.

Articles are non-compliant if they have no PMCID 3 months after publication.

How do I manage compliance?

Use NCBI's My Bibliography to manage professional bibliographies.

- Links to both eRA Commons, for grant information, and PubMed, for publication information.
- Enables linking papers with grants, tracking and managing compliance, manually uploading papers.

NCBI's My Bibliography

- Create an NCBI account.
- Link the NCBI account to the eRA Commons account.
- Manage your bibliography - use “Award View” to see Public Access Policy status for papers.

The screenshot displays the NCBI My Bibliography page. At the top, the navigation bar includes 'NCBI Resources' and 'How To'. Below this, the user's name 'rebeccaz' and 'My NCBI' are visible. The main heading is 'My NCBI > My Bibliography'. A red circle highlights the 'eRA Commons' icon. Below the heading, a status bar indicates 'This bibliography is private (make it public)' with links to 'Edit settings for My Bibliography' and 'Save My Bibliography to a text file (MEDLINE format)'. The 'Display Settings' section shows 'Award view, Sort by public access compliance, group by citation type'. A selection bar at the top of the article list shows '0 items selected' and buttons for 'Move', 'Delete', 'Copy', 'View', 'Suggest', 'Assign Awards', 'PDF report', 'Download as text', and 'Add citation'. The 'Journal Articles' section lists three articles with their public access compliance status: 1. 'Zolmitriptan for acute migraine attacks in adults' (Complete), 2. 'The Impact of Prior Authorization on Opioid Dependence' (In process at NHMS), and 3. 'The Impact of Prior Authorization on Opioid Dependence' (Complete). The right sidebar contains filters for 'Publication date', 'Awards', 'Publication type', and 'Paper-grant associations'.

Troubleshooting

Questions to ask yourself

1. What was published?
2. When was it published?
3. Who published it and what is their policy?

A/B -- look to the publisher (or to the submitting author)

C/D -- look to the submitting author

NIHMS -- Manual Submission

If you are going to submit manually, have:

- Author manuscript including figures, tables, image files, etc.
- User name and password to access [NIHMS](#) (e.g., [eRA Commons](#) or MyNCBI)
- Grant number(s) and date information
- PI contact information
- Delay period information (per copyright agreement)
