Overview MA PMP:

- The MA PMP was originally established by joint regulation of the Drug Control Program and Board of Registration in Pharmacy in 1992.
- The MA PMP collects dispensing information on Massachusetts Schedule II through V controlled substances and Gabapentin, a Schedule VI medication, dispensed pursuant to a prescription.
- Massachusetts General Laws Ch. 94C, Sec. 24A requires a practitioner to utilize the prescription monitoring program each time prior to issuing a prescription to a patient for a narcotic drug in Schedule II or III, and prior to prescribing to a benzodiazepine to a patient for the first time.
- MassPAT (MA Prescription Awareness Tool) provides a patient’s prescription history (1 year) for Schedules II – V to authorized end users (prescribers, pharmacists, law enforcement and regulatory board investigators).
